INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/EP00/09394

I. Basis of the report

1. With regard to the **elements** of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)*):

Description, pages:

1-32 as originally filed

Claims, No.:

1-21 as originally filed

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
- ☐ the claims, Nos.:
- ☐ the drawings, sheets:

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/EP00/09394

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

IV. Lack of unity of invention

1. In response to the invitation to restrict or pay additional fees the applicant has:

- ☐ restricted the claims.
- ☐ paid additional fees.
- ☐ paid additional fees under protest.
- ☒ neither restricted nor paid additional fees.

2. ☐ This Authority found that the requirement of unity of invention is not complied and chose, according to Rule 68.1, not to invite the applicant to restrict or pay additional fees.

3. This Authority considers that the requirement of unity of invention in accordance with Rules 13.1, 13.2 and 13.3 is

- ☐ complied with.
- ☐ not complied with for the following reasons:

4. Consequently, the following parts of the international application were the subject of international preliminary examination in establishing this report:

- ☐ all parts.
- ☒ the parts relating to claims Nos. in part 1-15,17-21 .

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

EXAMINATION REPORT**

International application No. PCT/EP00/09394

2. Citations and explanations
see separate sheet

Re Item IV

Compounds A, B and C are as defined in claim 1 of the present application.

Claim 1 of the present application appears to be known from US-A-3992332 (D1) and US-A-5830843 (D2). Both describe a method of use of fabric softening compositions in domestic applications for antipilling of fabrics.

In D1 (claims, col.2) these compositions are aqueous and comprise A) phosphate surfactant, B) fatty acid alkanol amide and C) dispersed polyoxyethylene dimethylpolysiloxane or polyoxyethylene polyoxypropylene dimethylpolysiloxane.

In D2 (examples, col.19) these compositions are aqueous and comprise A) a quaternary ammonium compound, B) polyethylene and C) silicon anti foam probably (dispersed dimethylpolysiloxanes).

Also, in case if compound C is really different, compounds A and B are clearly described therein.

Furthermore, EP-A-397245 (example XVIII) and EP-A-150872 (page 18) exemplify softener compositions comprising A, B and C.

The single general inventive concept of present claim 1 is therefore known.

There are, therefore, at least four (4) different groups of inventions according to the four quite different compounds B according to claim 1.

- 1) A + C + polyethylene (B1)
- 2) A + C + fatty acid alkanolamide (B2)
- 3) A + C + polysilicic acid (B3)
- 4) A + C + polyurethane (B4)

It should also be taken into account that there are four different compounds C according to claim 1, and the softening agents may be also many quite different compounds (from the quaternary ammonium compound to mineral oil) according to the description.

(In the examples of the application one softener type and B1 or B2 are used.)

Re item V

- 1) The examination relates to the first subject-matter of the claims as described above comprising the compounds A, B1 and C.
- 2) Reference is made to the following documents:
D1 US-A-3992332
D2 US-A-5830843
D3 GB-A-2281316
D4 EP-A-459822.
- 3) D2 (examples, col.19) describes a method of use of a composition for antipilling treatment for fabrics. The composition is aqueous and comprises a quaternary ammonium compound, polyethylene and siloxane anti foam which usually comprises dispersed dimethylpolysiloxane. Thus it is not clear if claim 1 and D2 are really different. Thus, the subject-matter of claims 1-3,7-15,17-21 is not novel.

If novelty can be demonstrated no inventive step can be acknowledged.

The treated fabrics in D2 already show good pilling properties. The problem of the present application is, therefore, to find an alternative.

The use of dispersed polysiloxanes in softener compositions is known, see e.g. D4 (claims, examples). An effect over D2 has not been demonstrated. Thus, the subject-matter of the claims is not inventive.

- 4) D3 (claims, bridging par. of pages 12-13) describes a method of use of a composition for antipilling treatment of fabrics. Said aqueous compositions comprise quaternary ammonium compounds and polyethylene. Claim 1 differs from D3 in that claim 1 additionally comprises dispersed polysiloxanes. The treated fabrics in D3 already show good pilling properties. The problem of the present application is, therefore, to find an alternative. The use of dispersed polysiloxanes in softener compositions is known, see e.g. D4 (claims, examples). An effect over D3 has not been demonstrated. Thus, the subject-matter of the claims is not inventive.
- 5) It should be also kept in mind that the softening agents are of quite different

nature. Also under this aspect there is no inventive step over the whole claimed range.

- 6) Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the above documents is not mentioned in the description, nor are these documents identified therein.
- 7) According to page 6 the dispersed polyorganosiloxane comprises an emulsifier, which is essential to the definition of the invention.
Since independent claim 1 does not contain these features it does not meet the requirement following from Article 84 EPC taken in combination with Rules 29(1) and (3) EPC that any independent claim must contain all the technical features essential to the definition of the invention.
- 8) In view of claim 1 the polyorganosiloxanes are not anionic, thus anionic on page 6, par. 6 has not been deleted.
In view of claim 1 the term usually at page 6, par. 7 has not been deleted.
According to page 17 there are hydrocarbon based fabric softeners whereas in claim 1 there are fabric softeners.
- 9) There are doubts if all the formulas at pages 14-16 are really fatty alkanolamides since the alkanol is not always situated at the nitrogen atom of the amide.
- 10) The SI units have not been additionally added at pages 23-25 (Rule 10.1 PCT).
- 11) The curing step in textile treatment usually takes several minutes and not several hours as described at page 1.

PCT

INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference HF/2-22104/P	FOR FURTHER ACTION see Notification of Transmittal of International Search Report (Form PCT/ISA/220) as well as, where applicable, item 5 below.	
International application No. PCT/EP 00/ 09394	International filing date (day/month/year) 26/09/2000	(Earliest) Priority Date (day/month/year) 05/10/1999
Applicant CIBA SPECIALTY CHEMICALS HOLDING INC. et al.		

This International Search Report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This International Search Report consists of a total of 3 sheets.

☒ It is also accompanied by a copy of each prior art document cited in this report.

1. Basis of the report

- a. With regard to the **language**, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).

- b. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international search was carried out on the basis of the sequence listing :

☐ contained in the international application in written form.

☐ filed together with the international application in computer readable form.

☐ furnished subsequently to this Authority in written form.

☐ furnished subsequently to this Authority in computer readable form.

☐ the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.

☐ the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished

2. ☐ **Certain claims were found unsearchable** (See Box I).

3. ☐ **Unity of invention is lacking** (see Box II).

4. With regard to the **title**,

☐ the text is approved as submitted by the applicant.

☒ the text has been established by this Authority to read as follows:

FABRIC SOFTENER COMPOSITIONS

5. With regard to the **abstract**,

☒ the text is approved as submitted by the applicant.

☐ the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

6. The figure of the **drawings** to be published with the abstract is Figure No.

☐ as suggested by the applicant.

☐ because the applicant failed to suggest a figure.

☐ because this figure better characterizes the invention.

☒ None of the figures.

CIBA SPECIALTY CHEMICALS HOLDING INC. et al

(=EP/P1)

1. Notice is hereby given that the International Bureau has communicated, as provided in Article 20, the international application to the following designated Offices on the date indicated above as the date of mailing of this Notice:
AU, KP, KR, US

In accordance with Rule 47.1(c), third sentence, those Offices will accept the present Notice as conclusive evidence that the communication of the international application has duly taken place on the date of mailing indicated above and no copy of the international application is required to be furnished by the applicant to the designated Office(s).

2. The following designated Offices have waived the requirement for such a communication at this time:
AE, AG, AL, AM, AP, AT, AZ, BA, BB, BG, BR, BY, BZ, CA, CH, CN, CR, CU, CZ, DE, DK, DM, DZ, EA, EE, EP, ES, FI, GB, GD, GE, GH, GM, HR, HU, ID, IL, IN, IS, JP, KE, KG, KZ, LC, LK, LR, LS, LT, LU, LV, MA, MD, MG, MK, MN, MW, MX, MZ, NO, NZ, OA, PL, PT, RO, RU, SD, SE, SG, SI, SK, SL, TJ, TM, TR, TT, TZ, UA, UG, UZ, VN, YU.
The communication will be made to those Offices only upon their request. Furthermore, those Offices do not require the applicant to furnish a copy of the international application (Rule 49.1(a-bis)).
3. Enclosed with this Notice is a copy of the international application as published by the International Bureau on 12 April 2001 (12.04.01) under No. WO 01/25381

REMINDER REGARDING CHAPTER II (Article 31(2)(a) and Rule 54.2)

If the applicant wishes to postpone entry into the national phase until 30 months (or later in some Offices) from the priority date, a demand for international preliminary examination must be filed with the competent International Preliminary Examining Authority before the expiration of 19 months from the priority date.

It is the applicant's sole responsibility to monitor the 19-month time limit.

Note that only an applicant who is a national or resident of a PCT Contracting State which is bound by Chapter II has the right to file a demand for international preliminary examination.

REMINDER REGARDING ENTRY INTO THE NATIONAL PHASE (Article 22 or 39(1))

If the applicant wishes to proceed with the international application in the national phase, he must, within 20 months or 30 months, or later in some Offices, perform the acts referred to therein before each designated or elected Office.

For further important information on the time limits and acts to be performed for entering the national phase, see the Annex to Form PCT/IB/301 (Notification of Receipt of Record Copy) and Volume II of the PCT Applicant's Guide.
